

## Growth capacity of Fleckvieh-bulls and heifers at field conditions:

Age in days	Bulls		Heifers	
	Weight in kg	Daily gains g	Weight in kg	Daily gains g
Birth	42		40	
210	309	1271	267	1081
365	491	1230	372	910

## Growth capacity of young bulls at the test station:

	Limousin	Charolais	Uckermärker	Fleckvieh
Birthweight kg	38	48	47	40
Weight at the beginning of the test period in kg	286	322	314	317
Weight at the end of the test period in kg	465	515	495	513
Daily gains during test period in g	1432	1544	1448	1569
Height at withers in cm	127	129	130	132
